Baccarat features up to 5 different betting options

Baccarat Bet Types

1- The Baccarat Martingale
The Pair bets have the highest potential return on your initial bet with a payout of 11:1.

If you lose a round, return to the first step of the sequence and start again.

Set yourself a strict limit and don't spend more than you would be comfortable with; as long as the values can be split similar to the above format.

6- The 3 2 System

Essentially, you set a chip size that becomes your base bet, and, after every winning round, you follow the pattern and add chips accordingly.

This allows you to get a chance with every bet type and never miss out on those all-important winning bets.
